## **Akatab - Character Set Support**

This font supports over 400 characters from The Unicode Standard as well as a number of Private Use Area (PUA) characters. In total, over 600 glyphs are included, supporting stylistic alternates for a number of characters as well as a large number of ligated sequences.

Note: Inclusion of basic Latin repertoire is provided as a convenience but is not intended for extensive Latin script use. The Latin glyphs are based on the OFL-licensed Source Sans Pro fonts in the Source Sans Github repository.
