Deprecated SIL Corporate PUA characters

Some characters formerly in the PUA have been added to Unicode, and so have been deprecated in our fonts. Those PUA characters are displayed as black boxes containing a white image of the deprecated glyph.

Andika New Basic supported characters

The supported character set for Andika New Basic is much smaller than for the main Andika font. The *Basic* fonts support only the Basic Latin and Latin-1 Supplement Unicode ranges, plus a selection of the more commonly used extended Latin characters, with miscellaneous diacritical marks, symbols and punctuation. In particular, these fonts do not support:

- Full extended Latin IPA
- Complete support for Central European languages
- Cyrillic

A much more complete character set is supported in the Andika fonts. The *Basic* fonts were intended as a way to provide additional weights for basic font users before the complete Andika character set was finished. So please don't request additional glyphs or characters to be supported in the Basic fonts—use Andika.
