Lateef - Versions and Changes

Announcement list

If you would like stay informed of updates to Lateef and other SIL fonts, please subscribe to the SIL Font News Announcement List. For more information see About.

Our font announcements are also available through Twitter [@silfonts](https://twitter.com/silfonts).

Current versions

The latest version of these fonts are always available from the Lateef download page as a .zip archive for all major platforms.

This font package is also available in the SIL software repository for Ubuntu. Users can subscribe to this software repository and get current versions and updates automatically.

Lateef is also available through the TypeTuner Web service, which allows you to choose among the smart font features and download a font with those features preset. This enables them to work in many applications that do not make use of OpenType Character Variants.

Previous versions

Previous versions remain available from our Previous Versions archive.

Change history

A detailed list of changes for each version of the fonts is on the Version history page.
